Homestead Valley Park's Restroom to Receive Upgrades

Today the Board of Supervisors approved a contract with DDH Apple Valley Construction, Inc. to renovate Homestead Valley Park's modular restroom building, install water and electrical utilities, a septic tank, and an American with Disabilities accessible ramp to the restroom.

"I think it is great that we are able to provide water and electric utilities and a septic tank for a park we enjoy for various recreational activities," said Third District Supervisor Dennis Hansberger.

DDH Apple Valley Construction was selected as the lowest responsible bidder.
